

# QUALITY POLICY

## QUALITY POLICY

**ATA Engineering and its employees are committed to meeting customer and legal requirements to achieve customer satisfaction. We will always strive to provide quality services on time and continually improve our Quality Management System.**

## MISSION

ATA is committed to using the best professional practices and providing the highest-quality engineering. Our success is measured by our short-term and long-term results and by the respect and trust ATA earns from our customers, our employee-owners, and the communities in which we operate. To provide the highest-quality results, ATA has established a quality system to govern design, analysis, and build supervision activities. All persons involved in these activities are required to be familiar with and implement these policies and procedures. ATA management and staff are committed to excellence and the use of good technical judgment, free from any commercial or financial pressures.
